Rail and Broadband Infrastructure Details

BROADBAND FIBER ACCESS DETAILS

Fiber backbone installed by Maryland Broadband Cooperative. Estimate to install broadband fiber pipe to property is $47,000. Contact Drew Van Dopp listed below for details. There are numerous broadband ISP’s to choose from.

“We have reviewed the build to 1954 Windsor and our ROM estimate is $47,000. This may have some flexibility in it, as we are estimating we to build to, but for planning purposes, I think this is within 5% of what it will ultimately cost.”

RAIL ACCESS DETAILS

Rail carrier is Delmarva Central Railroad. Based on aerial measurement there is approximately 420 front feet+/- of rail bordering the property. Current projected cost estimate to add a new rail siding from Delmarva Central Railroad - Quoted Below

“Assume $75,000 for the mainline switch plus $200/track foot (about $80,000 for 400’). A new 400 foot siding would cost about $150-$160K in total and could hold approximately six 60’ long railcars. Depending on the railcar volume the customer would ship, DCR could potentially assist with some of the siding construction costs.

Car length and method of unloading will depend on the commodity being handled. We could serve a rail customer at this location up to 5 times/week. If they unloaded 3 cars/day that would equate to up to 15 cars/week (750 cars/year) if needed.”

• **Chapter 17.76 - LIGHT INDUSTRIAL DISTRICT**

• **17.76.010 - Purpose.**

The purpose of the light industrial district is to foster the continuance of existing manufacturing and other light industrial uses and to encourage the location of new industries within the city to continually improve the economic base of the community. These uses require large sites served by highways, rail lines and utilities near enough to residential areas to provide employment with minimum travel time. To make these areas attractive to industries compatible with one another, maintain property values and protect residential areas adjoining or close by, uses are limited to those which do not create adverse external noise, vibration, smoke, dust, lint, odor, heat or glare. Uses which are explosive, toxic, or otherwise hazardous may be permitted by ordinance permit. In accordance with this purpose, which is in accord with findings and recommendations of the adopted land use element of the metro core comprehensive plan, the following uses, standards and area regulations have been established.

(Ord. 1839 (part), 2002: prior code § 150-77)
